

Daddy's eyes.

Momma's lungs.

He is the spitting image of his father, but it's his mother he really takes after.

Like his mother, Carl has a bad cough. Mom thinks coughing is normal for children his age. She doesn't realize he is suffering from chronic bronchitis and asthma, and that her cigarette smoke is causing it.

His parents, like many other caring parents, don't know that secondhand smoke is deadly.

When kids have to breathe secondhand smoke, they get hurt. Secondhand smoke causes half of infant breathing illnesses, is the leading trigger for asthma, doubles the risk of crib death, and causes ear infections and a host of other problems.

Don't make kids breathe secondhand smoke, because

Secondhand Smoke Kills.
